About the contest and judging

A card game "Shosu-daisuki" (I love decimal) will be the next product after "Bunsu-daisuki" (I love fraction.)

Even young children who have not learned decimal can enjoy playing with these cards. When we play, we naturally smile. And there is peace in it. Numbers are a universal and common language of the world. Let's play with people all over the world and make peace together! Your writing will become a part of this peace-making project. It does not matter if your writing is neat or beautiful, or how long you have learned calligraphy. Please try to put your player for world peace in your writing. And judges will feel it for sure. It would be a wonderful experience if your writing will be on the title of a package of a product. And it is scheduled to be sold overseas as well. If you are interested, please do not hesitate thinking like "I'm not going to win anyway." We are looking forward to your applications!
